Name	WISC-V SKÅRING PÅ Q-GLOBAL
Purpose:	WISC-V can be scored through Pearson Assessment's online scoring platform and automatic performance result compilation platform. Data is transferred from the computer to an encrypted database on a dedicated Pearson server. All data sent to or from the network application is automatically encrypted
Short description:	Q-global is an internet-based platform where you can score tests and generate reports. The internet-based solution means that you always have access to the scoring program without having to install the program locally on a computer. The raw scores are transferred from the protocol and recorded in the scoring program. Registration of raw scores is as easy as before, and the test results are compiled in the form of scaled scores, index scores, percentiles, discrepancy analyzes and graphs
User groups/user qualifications:	Authorized psychologist, cand.ed., cand.paed with specialization in pedagogical-psychological counselling and cand.paed.spec (UiO), master program in special needs education and master program in pedagogy with the field of study pedagogical-psychological counselling from UiO, certified user of ability tests
