

Name	METAFON-METODEN/ METAPHONE METHOD
Purpose:	Treatment method for children with phonological difficulties
Short description:	Metaphone is a structured method of therapy for children with phonological problems. The purpose is to help the child develop his or her ability to experience language sounds and understand how they are organized. The method was originally developed for English-speaking children and has been used in the UK for many years in the treatment of dysphonological children
Academic area/skills:	The method increases the linguistic awareness of the child
Target group:	3,5 to 7 years
Survey method:	Individual
Standardization:	Not stated
Adapted/non-adapted to Norwegian conditions:	Original English edition
Published:	1990
Author:	Elizabeth Daen, Janet Howell, Anne Hill and Daphne Waters
User groups/user qualifications:	Therapists using the metaphone approach
