

Name	CHILDREN'S TEST OF NONWORD REPETITION (CN Rep)
Purpose:	CN REP provides a reliable indicator of short-term memory which correlates well with language and other difficulties
Short description:	CN REP has been developed using unfamiliar spoken words which the child must attempt to repeat
Academic area/skills:	Short-term memory
Target group:	4-8 years old children or older children with language related learning difficulties
Survey method:	Individual
Standardization:	The easy to use tables supply standardized scores and centile points for ages four, five, six, seven and eight years which are derived from a sample of 612 unselected children attending primary schools in England
Adapted/non-adapted to Norwegian conditions:	Original English edition
Published:	1996
Author:	Susan Gathercole, Alan Baddeley
User groups/user qualifications:	Require qualified teaching status and a further Post Graduate Qualification in SEN (Special educational needs) i.e. Post Graduate Diploma or Masters. This qualification would need to be in SEN, SpLD (Specific Learning Difficulty) or a relevant field
