

Name	KORTSTOKKEN ARTIKULASJONSSTILLINGER
Purpose:	To enhance phonological and articulatory awareness, and to facilitate the reading and writing process, as well as the speech.
Short description:	Kortstokken artikulasjonsstillinger consists of a set of illustrations of the point of articulation for most of the Norwegian language sounds (phonemes) and a set of corresponding letters. Various English language sounds are also illustrated with accompanying phonetic symbols, IPA. The point of articulation is presented in the most comprehensive manner for the child, frontal incision. The package consists of 64 cards (picture cards and letter cards).
Academic area/skills:	Articulation and phonological awareness.
Target group:	Individuals who struggles with reading and writing difficulties, as well as pronunciation. The illustrations are age-neutral and can therefore be used when working with children, adolescents and adults in kindergarten and school. The picture cards can also be used by speech therapists working with adults with acquired speech difficulties, depending on the cause of the difficulty.
Adapted/non-adapted to Norwegian conditions:	Norwegian edition
Published:	Not stated
Author:	Hole, I. K.
User groups/ qualifications:	Speech therapists, special educators, teachers in kindergarten and school
